

**Mobile PLM: Anywhere & Everywhere  
Availability of PLM Data  
via Aras  
Innovator Mobile Solutions.**

**Summary**

Porchys Aras mobility application enables you to seamlessly connect to your Aras innovator product lifecycle management (PLM) environment on your go. Anywhere & Everywhere, be it Shop floor or while on move. Aras mobility solutions are available in iPhone, Android.

**Benefits**

Involve your users in product management all the time with Aras mobility solution anywhere without constraint of being in office or desk.

Make Aras information like project management, design, suppliers & customer's information available in real time. Bring Innovations using PLM by utilizing the information capture mechanism of SmartPhones or Tablets.

**Features**

Dashboard functionality of Aras Project management

Create, View, update the documents, Parts & Products.

Attach camera images to documents.

**Anywhere & Everywhere**

Product data now requires being accessible 24\*7 anywhere along with availability from shop floor to supplier locations and lastly on desk. The mobile Aras solution provides you the information on go irrespective of your location. You can leverage the latest smart-mobiles be it iPhone, Blackberry, iPad or Android powered phones. You can view the status and information. Review the documents and provide the feedback. Capture interesting idea or problem in manufacturing and share with design engineers.

The SmartPhones, tablets along with mobile Aras solution would enhance the productivity & enable information to be exchanged without the limitation of being connected via your laptop or desktop.

With the Aras mobile solution you can never be disconnected with your product data.

**Features continued**

Get & update the information of Suppliers, customers, Program.

Capture using camera and attach to document

**Use cases****Mobility is KEY:**

While being at suppliers or on customer's premises you can stay connected to Aras. You can pull up the latest designs & documents to provide information and collaborate on issues or suggestions, You can even create the Parts or manufacture Part and update design document at their premises. Aras innovative feature will allow you to capture the discussion using camera and attach to your design. This data can be immediately referred by design team.

**As Designed As Manufactured:**

Shop floor Engineers often make changes to product engineering, manufacturing planning and process, and/or quality information without updating the PLM system leading to classical problem of As Designed and Something else Manufactured. Inability of traditional PLM packages to involve early in design and collaborate in shop floor contributes to the problem.

Aras solution using mobile device, users can review the latest information, thereby facilitating As Designed As Manufactured. Shop floor processes can involve in capturing the manufactured Part or issues and provide complete loop of information sharing.

**New dimension of Product data:**

With passing day, more and more computing & mobility power would be available to the hands of users. The business process would need to utilize this change to its benefit. With Aras innovator of providing open PLM solution would enable to utilize the emerging power of hand held devices. The enterprises powered with mobility would be able to make better products thus remain competitive.
